Summary

Hi! I'm a software developer completing a computer science degree at Concordia University. With experience in frontend, full-stack, and technical writing, I bring versatility and initiative. Startup work has sharpened my communication skills, fostering industry-standard code and documentation.

Experience

Suited Ranges

August 2024 - Present

Front End Developer (React)

Montreal, Quebec, Canada

🔗 <https://suitedranges.com/>

- Headed and built the UI for the Suited Ranges Poker Trainer site using React, Typescript, and React Query for state management.
- Developed complex logic for the poker training situations and worked with large data sent to clients.

Flexspring

September 2023- April 2024

Full Stack Developer (Intern)

Montreal, Quebec, Canada

🔗 <https://www.flexspring.com/>

- Helped develop and redesign a React/Spring web app, written in Typescript with MongoDB database in a fast-paced startup environment.
- Developed RESTful API with industry-standard pattern design.
- Created dynamic React tables with column sorting, searching, and filtering done through server-side processing.
- Received firsthand experience with CI/CD workflows, software engineering design patterns, and the software development lifecycle.

Zebra Technologies

May 2022 - August 2022

Technical Writer (Intern)

Montreal, Quebec, Canada

- Worked within a team of front-end developers and engineers to create public component-level hardware and software solution documentation for the Matrox Imaging Library.
- Created User Guide and API Documentation for the barcode scanning module of the machine vision library

Projects

My Blog and Portfolio

January 2025

Checkout my personal site to view my projects and blog posts about all things web development
